WORK EXPERIENCE

Information Systems Engineer

Ennadhafa Judy

📅 Jan 2025 – Present

- Delivered end-user technical support and administered **SAP user roles and authorizations**.
- Designed and developed custom **ABAP programs, reports, and transactions** to automate business processes — including **FTP file exchanges** (generation, validation, and upload of CSV/Excel extracts) and **automated email notifications and report distribution** using background jobs.
- Built and optimized **SAP queries and Fiori applications**, enabling tailored data extraction.
- Contributed to the **implementation of the Assabil Sales Force solution**, covering all project phases from **data cleansing, testing, and integration** to user training and go-live support.
- Customized and extended the **Flowable (v6.8.2)** open-source BPM platform to digitalize workflow-driven processes such as **exit voucher management** and **customer/vendor master data requests**.
- Modeled and implemented **BPMN and DMN** processes including tasks, events, data mappings, and decision tables to standardize and automate approval workflows as well as Developed and deployed **external service workers..**
- Documented the application and managed its deployment.

Key Words: Flowable, Spring Boot, Angular, Mantis, SAP Fiori, SAP GUI , ABAP , Workflow Automation

INTERNSHIPS

Notification Platform

Wevioo

🌐 https://github.com/farahjerbi/PFE_WEVIOO.git

📅 Feb 2024 – Aug 2024

- Developed a scalable web platform to manage notification templates and provide APIs for multi-channel notifications, including email, SMS, WhatsApp, and web push.
- Implemented features for template customization and AI-driven search engine to enhance user engagement across all communication channels.

Key Words: React (TypeScript), Spring Boot, PostgreSQL, GitLab CI/CD, Flask, TensorFlow, SpaCy, Docker, Microservices

Legal Docs

Axe Finance

🌐 <https://github.com/farahjerbi/LegalDocs.git>

📅 July 2023 – Sept 2023

- Developed a dynamic component engine in Angular powered by JSON configurations, with full support for multilingual functionality.

Key Words: Angular - .Net6 - Bootstrap - AntV -SQLServer- internationalization - OpenAI

TTManger

Tunisie TELECOM

📅 Aug 2022 – Sept 2022

- Developed a Java desktop application dedicated to the Regional Directorate of Tunisia Telecom in Nabeul. This application enables the administration to have better control over the management of professional training for their personnel.

Key Words: Java - Git - Swing - Java DataBase Connectivity

ACADEMIC PROJECTS

IntelliPath

🔗 https://github.com/taiefhilali/5TWIN5_ArTech

📅 Oct 2023

- An online learning platform designed to revolutionize our approach to education.

Key Words: Angular - SpringBoot - Microservices - Mysql - H2 - Docker - keycloak - Eureka - Docker composer - openFeign - Chat - SignalR - .Net6 - Api Gateway

Kaddem

🔗 <https://github.com/farahjerbi/Kaddem-BackEnd.git>

📅 Oct 2023

- A contract management application designed to conceive and implement a team allocation program for students from various specialties and to manage student contracts based on their participation in team activities.

Key Words: SpringBoot - Angular - MySQL - Bootstrap - Jenkins - Docker - Grafana - DevOps - Prometheus - Nexus - SonarQube

GiveBack

🔗 <https://github.com/PI-4TWIN5-Enigmatic/PI-Enigmatic.git>

📅 Jan 2023

- A social media platform that serves as a bridge between non-profit organizations and donors.

Key Words: React - NodeJS - Material-Ui - Bootstrap - AntV - fontAwesome - MongoDB - OpenAi - Leaflet- OAuth2 - Stripe - ZegoCloud - Nodemailer - sockets

EDUCATION

Private Higher School of Engineering and Technology - ESPRIT

📅 Software Engineering 2021 - 2024

Preparatory Institute for Engineering Studies of Nabeul - IPEIN

📅 Physics and Chemistry for Engineering 2019 - 2021

Pioneer High School Nabeul - LPN

📅 Scientific Baccalaureate 2015 - 2019

ORGANISATIONS

Logistics Manager Of IEEE ESPRIT SIGHT INFINITY GROUP

📅 2021-2022
